PROFESSIONAL SUMMARY

I am a highly motivated and results-oriented software engineer with a proven track record in developing robust and innovative solutions for complex systems. My expertise lies in embedded systems, real-time software development, and flight software (FSW) development using C/C++ and Python. I have a strong understanding of aerospace engineering principles and experience working with real-time operating systems (RTOS) such as VxWorks and embedded Linux. I am proficient in software testing methodologies, utilizing frameworks like GoogleTest and PyTest, and experienced in building and integrating software for spacecraft avionics, sensors, and GNC systems. My experience spans the entire software development lifecycle, from requirements gathering to deployment and maintenance, with a focus on delivering high-quality, reliable, and maintainable code.

WORK EXPERIENCE

University of California Security Engineer

Oakland, CA (Remote)
March 2025 - Present

- Helped develop standardized workflows and automation for UC-wide vulnerability detection and mitigation across MacOS and Windows endpoints, supporting a systemwide cybersecurity and compliance initiative.
- Investigated security risks in fringe and unmanaged applications, writing custom remediation scripts and policies to address non-standard vulnerabilities, leveraging innovative thinking and advanced troubleshooting skills.
- Built a unified dashboard integrating Rapid7, Jamf, BigFix, and ServiceNow (SaaS), improving threat visibility and enabling more efficient SecOps response through real-time database and asset data aggregation.
- Automated asset tracking and compliance monitoring through cross-platform scripting (Python, Bash, PowerShell), reducing manual workload and improving coverage across multiple operating systems.
- Coordinated with IT teams to align endpoint security practices with compliance standards, streamlining reporting, supporting project management efforts, and improving interdepartmental collaboration in a cloud computing environment.

Great Wolf Resorts Security Support Engineer

Chicago Corporate Office (Remote)
May 2023 - March 2025

- Developed and maintained automation scripts for hybrid Azure tenant management, deploying updates for Carbon Black agents, Citrix patching, and BitLocker device enforcement across 10,000+ endpoints.
- Automated security certificate deployments using CrowdStrike RTR and PowerShell, preventing service disruptions for critical teams and saving an estimated 200+ hours in manual interventions annually.
- Engineered a PowerShell interface integrated with Microsoft Graph API for managing distribution lists of 10,000+ users, eliminating human error and reducing annual manual workload by 500+ hours.
- Built SQL log query frameworks in Rapid7 with Pandas/NumPy analytics pipelines, creating dynamic visualizations to detect suspicious behavior and inform executive decisions on security posture.
- Led security awareness campaigns via KnowBe4, developing custom Python tools to analyze phishing simulation data, transforming raw metrics into actionable insights that improved employee compliance rates by 25%.

Simple.biz Freelance Web Developer

Durham, NC (Remote)
August 2022 - May 2023

- Delivered production-ready websites with optimized performance and SEO enhancements (e.g., alt tags, meta descriptions), incorporating automation scripts for build processes that improved search rankings and client visibility.
- Implemented WCAG/ADA compliance guidelines through automated testing tools like Selenium, ensuring inclusive web applications and boosting usability scores while reducing accessibility-related issues.
- Conducted cross-browser/device compatibility testing with scripted automation, resolving discrepancies and achieving a 30% decrease in user-reported issues across platforms.

TECHNICAL SKILLS

Programming Languages: Python, C/C++, Java

Frontend: null

Backend: null

Cloud & DevOps: Docker, Git, GitLab CI/CD, CMake

AI & LLM Tools: null

Automation & Productivity: null

Security & Operating Systems: null

Databases: null

EDUCATION

California State University - Monterey Bay
B.S., Computer Science
Capstone Award for Innovation (2024)

December 2024

CERTIFICATIONS

AWS Certified Cloud Practitioner

January 2025
